

Sharp Announces the MX-B201D Multifunction Document System!

Sharp is pleased to announce the new MX-B201D Multifunction Document System, offering versatile features in a compact design. This productive device delivers a fast 20 ppm copying/printing, and integrated color PC scanning. A 50-sheet reversible document feeder provides efficient duplexing, while Sharp's innovative network scanning technology allows users to store or send documents in an instant. And since business never stands still, the MX-B201D Multifunction Document System offers flexible options to add Super G3 faxing, network printing and scanning, and web-based management...so users will never miss a beat.

Base model shown with optional MX-CS10 Paper Tray

Streamline Document Workflow With Built-in Color PC Scanning

The MX-B201D can easily convert color and monochrome documents into digital files that can be printed, stored or e-mailed. With a robust 50-sheet RSPF document feeder, and standard 300-sheet paper supply, it has what it takes to get the job done. And with the optional 250-sheet paper tray that brings total paper capacity to 550 sheets, the MX-B201D can manage large-scale projects with ease.

High Quality PC Printing

The MX-B201D offers impressive 600-dpi resolution printing so documents always look professional. A high-performance print controller automatically compresses files so they process and print faster. Networking is plug-and-play, with connections for USB 2.0 interfaces. Additional features include auto duplexing, electronic sorting, offset stacking, and 2-up/4-up printing, making the Sharp MX-B201D a smart choice for busy offices.

Convenient Web-Based Management and Easy-to-Use Sharp Utilities

Sharp's online management tools offer both users and administrators time-saving features, including scan destination management, Remote E-mail Diagnostics, device configuration, and more. A familiar, easy-to-use interface provides sophisticated controls for monitoring printer usage and managing security features. And with Sharp Remote Device Manager (SRDM), IT professionals can manage virtually any SNMP-compliant printer on your customer's network from one interface. Designed for desktop users, Printer Status Monitor allows them to view printer conditions and check supply status.

Pricing

A price list has been attached along with this announcement bulletin.

MX-B201D Availability

The new MX-B201D is available immediately for B2B orders.
